 - Testing the stability and functionality of the application.

RELEVANT PROJECTS

- **Project: Ayurveda web application**
- **Technologies:-** Html, Css, Java Script, React js , Python Django, My Sql
- **Role: Developer**
- **Team Size: 6**
- **Description :-**

The Ayurveda web application is designed to promote and facilitate Ayurvedic health and wellness practices. It serves as a platform for users to access information, book appointments with Ayurveda practitioners. purchase Ayurvedic products, and engage with educational content related to Ayurveda.

- **Key Features and Functionalities:**

- **User Registration and Authentication:**
 - Users can create accounts and log in securely.
 - Authentication includes email verification and password reset functionality.

- **User Profiles:**
 - Users can create and manage their profiles
 - Profile information includes name, contact details, and personal preferences.

- **Dashboard:**
 - A personalized dashboard for each user displaying relevant information.
 - Users can see their upcoming appointments, recent purchases, and recommended product or services.

- **Conclusion:**

The Ayurveda web application aims to bridge the gap between traditional Ayurvedic practices and modern digital convenience, providing users with a holistic and informative platform for Ayurvedic health and wellness.
